## EXPERIENCE

---

### Rotational Software Engineer

April 2024 - Current

Meta

- Built and maintained user-facing features across **Messenger**, **Facebook** and **Instagram** in **CSS**, **React**, **Typescript** and **PHP**.
- Increased **global** user engagement by **16%** for new community type.
- Proactively identified and resolved critical production issues, ensuring system reliability and performance.
- Authored technical documentation and contributed to engineering best practices.

### Software Engineer Apprentice

March 2022 - March 2023

Pinterest

- Boosted performance and engagement by **25.8%** by spearheading development of innovative mobile web features in **HTML**, **React** and **Typescript**.
- Modernized the codebase and **API** with **Python**, **GraphQL** and **Redux** to ensure a stable user experience for **500 million users**.
- Utilized **A/B testing** to validate feature effectiveness and analyzed user data based on metrics and qualitative results.

### Software Engineering Fellow

September 2021- February 2022

Formation

- Selected for highly competitive fellowship for personalized coaching from top-tier software engineers.
- Completed intensive training to master theoretical CS topics through independent projects, pair programming, and small mentor led groups.
- Implemented production ready features including improving the user experience by preventing re-rendering when fetching data and infinite scrolling for dynamic data fetching and rendering.

### Software Engineer

September 2020 - February 2021

Dotdash Meredith

- Improved the design and architecture of large front end codebases for Investopedia and theBalance using **React**, **Node**, **HTML** and **CSS**.
- Enhanced reader retention **20%** by building new features and **UI components**.
- Analyzed data with **Grafana** and **Kibana** for debugging and improved performance.

### Front End Engineer Intern

April 2020 - September 2020

Appetizer Mobile

- Pioneered the creation of The Masked Singer: Mask Yourself app for web audiences.
- Automated database management by developing **microservices** and **API** with **JavaScript** and **Python** and **PostgreSQL**.
- Decreased load times by **9%** through auditing and performance profiling techniques.

### Wordpress Developer

December 2019 - May 2020

Freelance

- Managed the entire project lifecycle as a solo freelance developer, from conceptualization to timely delivery.
- Collaborated with clients to understand project requirements and goals, ensuring clear communication throughout development.
- Responsible for the architecture, design and development of custom **Wordpress themes** and **plugins** using **HTML**, **CSS**, **PHP**, **JavaScript** and **MySQL**.
- Implemented **Google Analytics**, social media and **SEO** best practices.

## Full Stack Developer Intern

March 2019 - August 2019

Semnexus

- Implemented eCommerce solutions using **Ruby on Rails**.
- Collaborated seamlessly with cross functional teams including product managers, designers, and QA engineers.
- Established development of company wide internal documentation.

## EDUCATION

---

**42 Silicon Valley** | Software Engineering

**New Jersey City University** | Media Studies

## SKILLS

---

JavaScript, Typescript, XHTML, HTML, CSS, PHP, React, React Native, Vue, NextJs, Node, Express, Accessibility, Redux, Relay, HTTP, GraphQL, PostgreSQL, Cypress, Jest, Helium, Jenkins, Jira, Grafana, Kibana, Webpack, Babel, RESTful APIs
